

THANK YOU FOR SUPPORTING OUR TREE PLANTING AND FOREST CONSERVATION PROJECT

Our amazing tree planting team, Trizzah, Angellah, Fraser and Cecilia are working with community groups and farmers in Mzimba District and it's the time of year when the seedlings are being planted out, 1,000 of which were donated by Meadfleet.

Medson Mvula is 24 year old. He started tree planting in 2020 when he planted 1,000 trees and he planted another 1,000 in 2021. This year he has raised 2,000 seedlings and is busy planting them out.

And for every tree planted, we protect three in an existing forest. In January we welcomed Mzimba District Forestry Officer, Wilfred Banda, and several of his District colleagues to see both our tree planting and forest conservation projects. He said, "What we have seen are remarkable things - good woodlots and good interventions in terms of efficient cooking technologies. This has been so impressive."
